

## A20 certificate of conformity

The European REACH Regulation [Registration. Evaluation. Authorisation and Restriction of Chemicals] N°1907/2006 came into force on June 1, 2007. It aims to ensure a high level of protection for human health and the environment with regard to chemicals, while promoting competitiveness and innovation.

Since May 31, 2018, all substances manufactured in or imported into Europe covered by this regulation must be registered.

As a manufacturer of paints and articles for horizontal signage or thermoformed decoration, GEVEKO MARKINGS has checked with its suppliers that all the substances used in its formulations are registered, excluding those exempt from registration, thus guaranteeing its supplies of raw materials.

Having familiarized itself with this regulation, GEVEKO MARKINGS undertakes to use only substances complying with Regulation 1907/2006/EC in its formulations.

After verification, GEVEKO MARKINGS certifies the absence of the substances listed in checklist A20 in all articles and products delivered to ADAPTOR (Norway).

This concerns:

1. ACTISOL
2. Articles such as (Podo tactile strips, Guide rails, Thermoformed resin products...)

**GEVEKO MARKINGS** undertakes to take all reasonable measures to provide the information required by the REACH Regulation to its customers.
